Ufaq Ashraf (Female)   **+923234922979**   **ufaq.ashraf@gmail.com**

Core Competencies

I am a self-driven professional having more than 8 years of working experience mostly on MS technologies. I am a highly resourceful, innovative, and competent PHP developer with extensive experience in the layout, design and coding of websites specifically in PHP format. Possessing considerable knowledge of the development of web applications and scripts using PHP programming language and MySQL & SQL Server databases. Experienced in developing applications and solutions for a wide range of corporate, charity and public sector clients and having the enthusiasm and ambition to complete projects to the highest standard. I have a strong understanding of Agile Development methodologies and have experience in managing small and large teams of engineers. During my career I had been working on the technologies mentioned below:

- **Backend**: Php, Web API
- **Middle Tier Technologies**: Web Services.
- **Php Technologies**: Web Forms, Web User Controls, Web Custom Controls.
- **Frontend:** Java Script, jQuery, bootstrap, html, css.
- **Methodologies & designing**: Agile modeling, SCRUM, Object Oriented.
- **Analysis and design**: Object Oriented Analysis & Design.
- **Database**: Oracle, Microsoft SQL Server, MySQL.
- **Frameworks & APIs**: CodeIgniter, MVC, Entity Framework, CMS, Laravel, Custom MVC.
- **Web & App. Servers**: Apache
- **Control System:** Git**,** trello**.**
- **Linux:** Homestead, Ubuntu.
- **Miscellaneous:**
    - Working on Complex system
    - Good idea of Unit testing
    - Good idea of math and models
    - Good idea of Database

Personal Characteristics

People know me as energetic, outgoing and dedicated individual with a keen eye for my project and team and our common goals. Building trusting relationships with team, clients and stakeholders comes naturally to me, just as I work and communicate at all levels and in different cultures. I am a strong negotiator, and I get the task done by applying my analytical, structured and proactive approach, in flexible combination with my distinct commercial understanding. I truly value personal integrity in all what I do.

Professional Experience

2019 – present   Senior Software Engineer   AdeoGroup Scotland

Responsibilities

- To manage various clients website back-end development requests

- Performing maintenance and architecture changes on our proprietary software

- Modifying database structures

- Development and planning of new software

- Help with support tickets as and when needed

- Support the team with customer updates

- Do updates on existing customer sites

    An advocate of the Adeo brand

2017 – 2019　Senior Full Stack Php Developer　　Dazadi Canada

Responsibilities

- Development of the applications in parallel using Php in frameworks CodeIgniter, laravel, Custom CMS.
- Design and Implement scalable build, test and deployment systems applying Continuous Integration/Delivery concepts.
- Analyze the project's scope to design its back-end, front and database individually.
- Coordinate with other teams, system Architects and stakeholders to ensure that the system runs and interfaces smoothly
- Maintain required systems documentation and identify the technical design and system architecture improvements
- Designed its database in MySQL.
- Developed all its interfaces in bootstrap, html, CSS, jQuery, JavaScript.
- Architecture, design, and development of web based study abroad application and admin panel using Php CodeIgniter.
- Applying standard practices and procedures to the software development life cycle.

2015 – 2017　　Principal Software Engineer　　　Zeetech Dubai

Responsibilities

- Lead the team of developers to deliver the project well in time
- Development of the application using MVC
- Involve in identifying the use cases, performing analysis and creating class diagrams

- Used different tools to enhance the overall efficiency of the application
- Performance tuned the SQL stored procedures and functions
- Write system analysis and design document for the project
- Translated the client requirements to the functional specification
- Team management, task assignment and timelines
- Worked as an individual developer to develop web based applications like event management system, photography management system and jeweler's management system.
- Analyze previously built application design and recommend improvements
- Maintain required systems documentation and identify the technical design and system architecture improvements
- Develop the application using php.
- Acquire and maintain knowledge of core application components of the system.
- Coordinate with the business analysts and stakeholders to ensure that the system runs and interfaces smoothly
- Maintain required systems documentation and identify the technical design and system architecture improvements
- Performed SQA of all products to ensure product quality.
